**Subject:** Re: CWCM Event #5 & Background Sediment Sampling

We will be postponing the background sampling until the w/o of Nov 12....

>>> <Vaughn.Stephanie@epamail.epa.gov> 11/1/2012 3:08 PM >>>

Thanks for the update, and all of what you say makes sense....I think we'll have to be flexible and count on delays/issues coming up for at least the next couple of weeks.

As I said in a previous message to you, I think it makes sense to delay the background sampling. Let's talk about the details next week. If you want to talk sooner, feel free to give me a call on my cell.

Thanks

Subject: CWCM Event #5 & Background Sediment Sampling

Stephanie:

AECOM spoken to with OSI this morning.

The CPG is postponing Routine Event #5 and will aim for te w/o of 11/12, but are unsure it will happen. CDM has been informed.

In addition to situation with power, gas and hotels (none will allow the boat trailers), OSI has been unable to reach either City Park in Bayonne or the Passaic River Yacht Club to determine if they can be utilized. We need both facilities to conduct the CWCM Routine events in any reasonable fashion. OSI is also skeptical that they would get the wide load permits needed to get the CWCM boats to NJ.

OSI has staff heading south who will stop at specific places in NJ to assess the situation and they will let me know what's going on.

We also need to discuss whether we should move forward on the Background Sediment Sampling

Please contact me with any questions.

Thanks

R/  
Rob
